

Domain Setup Office365:

1. In the Admin center, go to the [Domains](#) page, or choose **Setup > Domains**.
2. Choose **Add domain**.
3. Enter the name of the domain you want to add, then choose **Next**.
4. Choose how you want to verify that you own the domain.

To keep your domain secure, we need you to prove that you own it. Select a verification method.

Sign in to GoDaddy (recommended)
Since GoDaddy is your domain registrar, all you have to do is to sign in to verify your identity.

Verification email
We'll email a verification code to the registered contacts of plbaum.com as provided in [WHOIS](#). Please note that the verification code expires in 60 minutes.
[How does this work?](#)

Add a TXT record instead
We'll provide a TXT record that you'll have to add at GoDaddy instead.

5. Choose how you want to make the DNS changes required for Office to use your domain.
 - a. Choose **Add the DNS records for me** if you want Office to configure your DNS automatically.

Add the DNS records for me (recommended)
We'll update your DNS records at GoDaddy.

I'll add the DNS records myself

- b. Choose **I'll add the DNS records myself** if you want to attach only specific Office 365 services to your domain or if you want to skip this for now and do this later.

Add the DNS records for me (recommended)
We'll update your DNS records at GoDaddy.

I'll add the DNS records myself

Choose this option if you know exactly what you're doing.

6. If you chose to *add DNS records yourself*, choose **Next** and you'll see a page with all the records that you need to add to your registrars website to set up your domain.

^ CNAME records

Please add these records at your DNS hosting provider. [step-by-step ins](#)

[Copy this table](#)

Host name	Points to address or value
autodiscover	autodiscover.outlook.com
sip	sipdir.online.lync.com
lyncdiscover	webdir.online.lync.com
msoid	clientconfig.microsoftonline.com
enterpriseregistration	enterpriseregistration.windows.net

If you want to wait for later, scroll to the bottom and choose **Skip this step**.

7. Click **Finish** - you're done!
